INSTITUTION DISTINCTIVENESS

Institutional Social Responsibility (ISR)

The College Organizes Health Camps and public awareness rally in its nearby villages every year in which teachers, students, government doctor and member of Gram Panchayat Participate. Through our college every year summer camp organized for students from government and private schools nearby villages. So that can become proficient in such disciplines as computer, yoga, sports and art-craft. Our aim is to bring the rural area students into the Professional Courses. According Our Vision and objective to provide high quality education and economic progression of student is achieved by our student that's why they trust our institution region behind of trust number of student university topper in every year, number of student playing national state level game every year, number of student job in private and government sector every year.

The college always considers the progress of rural area student is actual strength of the institution. Higher Education Institutes has the opportunity to develop skills and knowledge in the rural population, helping them to make informed decisions on their agricultural businesses and innovate in agricultural affairs. The rural emersion can generate many positive results, such as a greater ability to understand the rural population their need an opportunities and policies, procedures, rights, duties, government schemes, legislation, benefits available and protection laws for rural areas It is important to understand the need for quality education in rural areas, because it helps to maintain rural aeas. Young people are moving to urban areas in search of better education and employment opportunities, the improvement of rural education is a possible strategy to maintain them in rural areas.

Higher education institutes are not only responsible for the creation of knowledge for the well-being of humanity but also may play an important role in strengthening the community and

rural life. College has set up a Swacchhata Action Plan (SAP) committee and Vocational Education, Nai Talim Experiential Learning (VENTEL) committee under the guidelines of Mahatma Gandhi National Council for Rural Education (MGNCRE), Ministry of Education, and Government of India and recognized for the work done under it.

Oxygen Park construction guidance

The oxygen park established provides example of natural “lungs” to the cities. The trees and plants once at a certain height require little to no care unless faced with prolonged drought or disease period. The oxygen parks can become a role model for other institutions and organizations so large scale parks can be established in cities for the clean air. The increased city habit of taking morning walks, jogs and runs can be seen in a completely new light. Oxygen parks can become the centers of health related habit based activities. Simply because they offer cleaner and more oxygenated air. The use of community engagement programmes and adopting villages by educational institutes can speed up the swachhata campaigns

If cities and their citizens can ensure that such oxygen parks can be established, even on a small scale, the whole concept of maximizing the value of our green spaces can become a reality. Parks and gardens allotted by the city can accommodate the diversity of flora for its purposes. While such oxygen parks can relieve oxygen levels, temperature and pollution very well. Oxygen parks and such concepts are like hybrid technologies for the green landscape. Of course, they are ecological, extremely efficient and allow a sustainable ecosystem to be built around them. Ultimately, it allows us to save on our energy consumption and actually live healthier lives in cleaner environments. Maintaining a clean college environment is a good example for students. Cleaning is incredibly important when it comes to reducing the spread of diseases in the institutes and means that staff and students can enjoy a comfortable learning environment. It also improves hygiene levels and can help reduce the spread of disease.
